

NIMMA-GURU

Project Requirement Document (PRD)

Community Mentorship Android Application

1. Problem Statement

In rural areas, many retired professionals such as teachers, engineers, and skilled workers are eager to give back to society. However, there is no structured platform to connect these voluntary mentors ("Gurus") with students who need academic or skill-based guidance after school.

2. Vision

Nimma-Guru is a community-driven mentorship platform that connects local mentors with students. It serves as a non-commercial directory where retired professionals can offer free weekend classes at community centers like Samudaya Bhavana.

3. Objectives

- Enable retired professionals to contribute their knowledge effectively.
- Help students access mentorship locally without financial barriers.
- Promote the concept of **Gyaan-Daan** (Knowledge Sharing).
- Strengthen community-based education ecosystems.

4. Target Users

Primary Users:

- Retired Professionals (Gurus)
- School Students

Secondary Users:

- Parents
- Community Coordinators

5. Key Features

5.1 Guru Profile

Create and edit profiles, add specialized skills (Math, Science, Carpentry), set availability timings, and specify physical location.

5.2 Search & Discovery

Search mentors by subject and location using an intuitive interface. Implementation of **ChipGroup** for fast and responsive filtering.

5.3 Class Calendar

A centralized view for upcoming sessions displaying specific dates, times, subjects, and community venues.

5.4 Appreciation System

A "Wall of Fame" where students can post thank-you notes and feedback to recognize the Guru's contribution.

5.5 Multi-language Support

Full support for **Kannada** and **English** to ensure local accessibility.

6. User Flow

Guru: Register → Profile Creation → Add Skills/Availability → Publish.

Student: App Launch → Search/Filter → View Profile → Attend → Appreciate.

7. Technical Requirements

Kotlin

Android SDK

Firebase Firestore

Firebase Auth

- **UI/UX:** Elderly-friendly design, large typography, and high-contrast buttons.
- **Components:** RecyclerView, ChipGroup, Calendar View, Firestore Integration.

8. Impact & Success

The success of Nimma-Guru is measured by the accuracy of its search results, the ease of profile management for elderly users, and the growth of a knowledge-sharing culture in rural developments.
